How to Use the Report

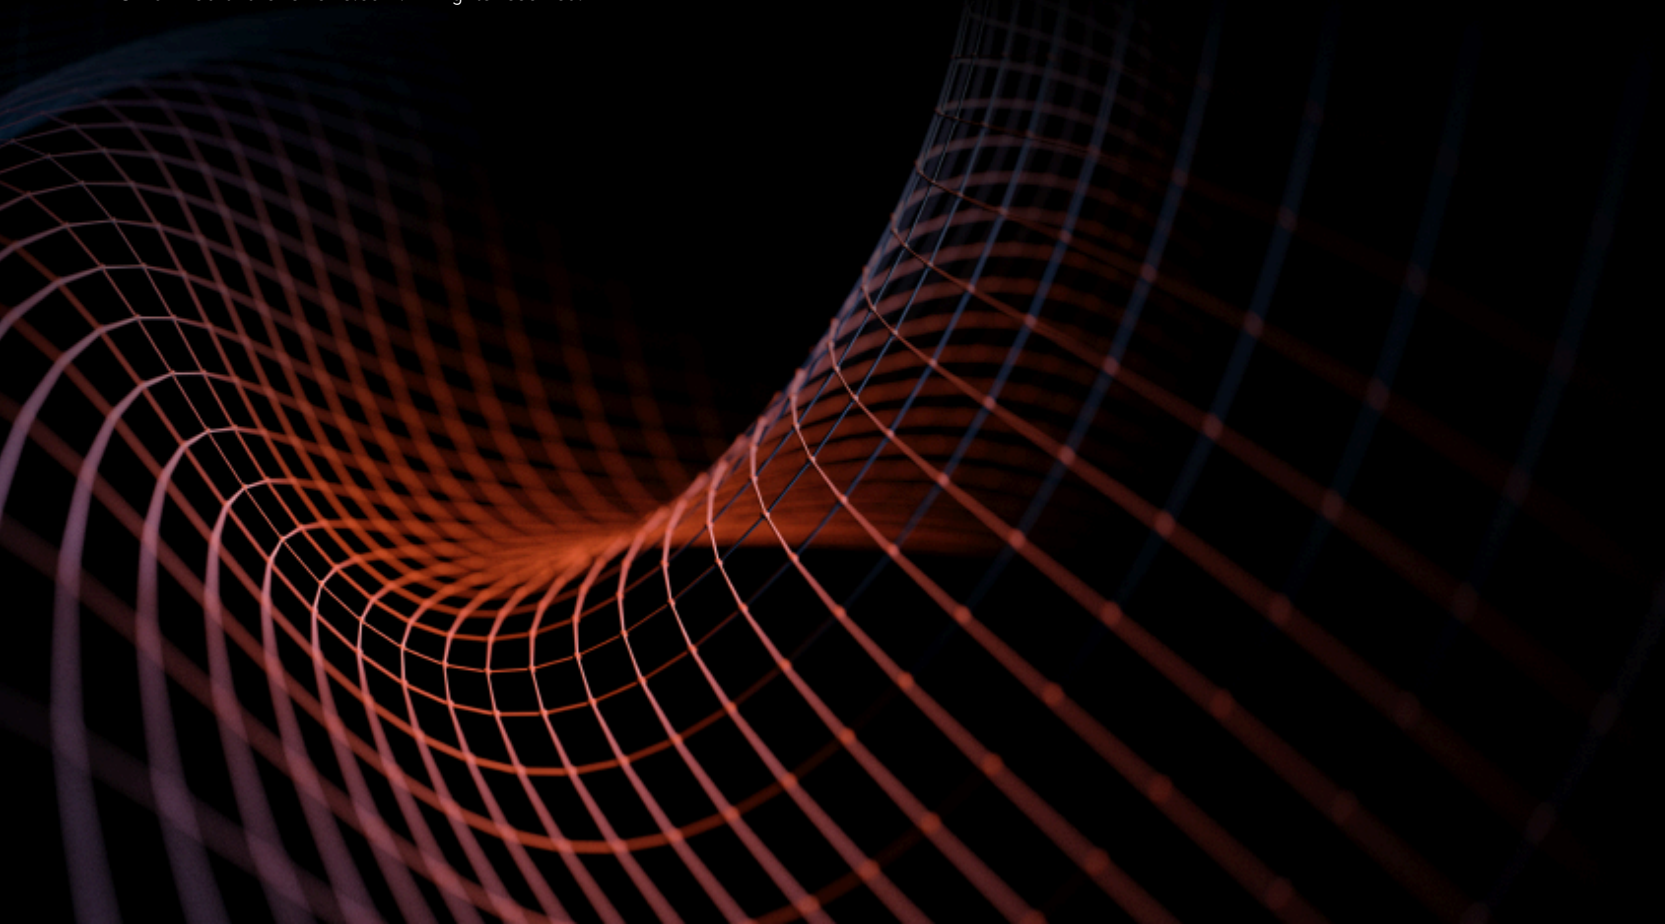

Info-Tech's Category Reports provide a comprehensive evaluation of popular products in the Conversational AI market. This buyer's guide is designed to help prospective purchasers make better decisions by leveraging the experiences of real users.

The data in this report is collected from real end users, meticulously verified for veracity, exhaustively analyzed, and visualized in easy to understand charts and graphs. Each product is compared and contrasted with all other vendors in their category to create a holistic, unbiased view of the product landscape.

Use this report to determine which product is right for your organization. For highly detailed reports on individual products, see Info-Tech's Product Scorecard.

This report is available free of charge for internal use only to assist with software evaluation and selection. Sharing, republishing, distributing, or otherwise copying any portion of this report without the express written consent of SoftwareReviews.com is strictly prohibited.

SOFTWARE REVIEWS

Emotional Footprint Diamond

The Emotional Footprint Diamond illustrates how users view their interactions with their software vendor compared against their perceived cost to value of the software. This delivers you an in-depth insight into your potential relationship with the vendor.

CONVERSATIONAL AI

The customer experience with a software vendor will be a complex relationship that spans procurement, implementation, service, and support. Picking software can commit you to an extended period with that vendor, and knowing how real users feel about their service experience is crucial before making that commitment. When compared with how fair the price is for the software, you receive a comprehensive overview of the expected interaction and experience with the vendor.

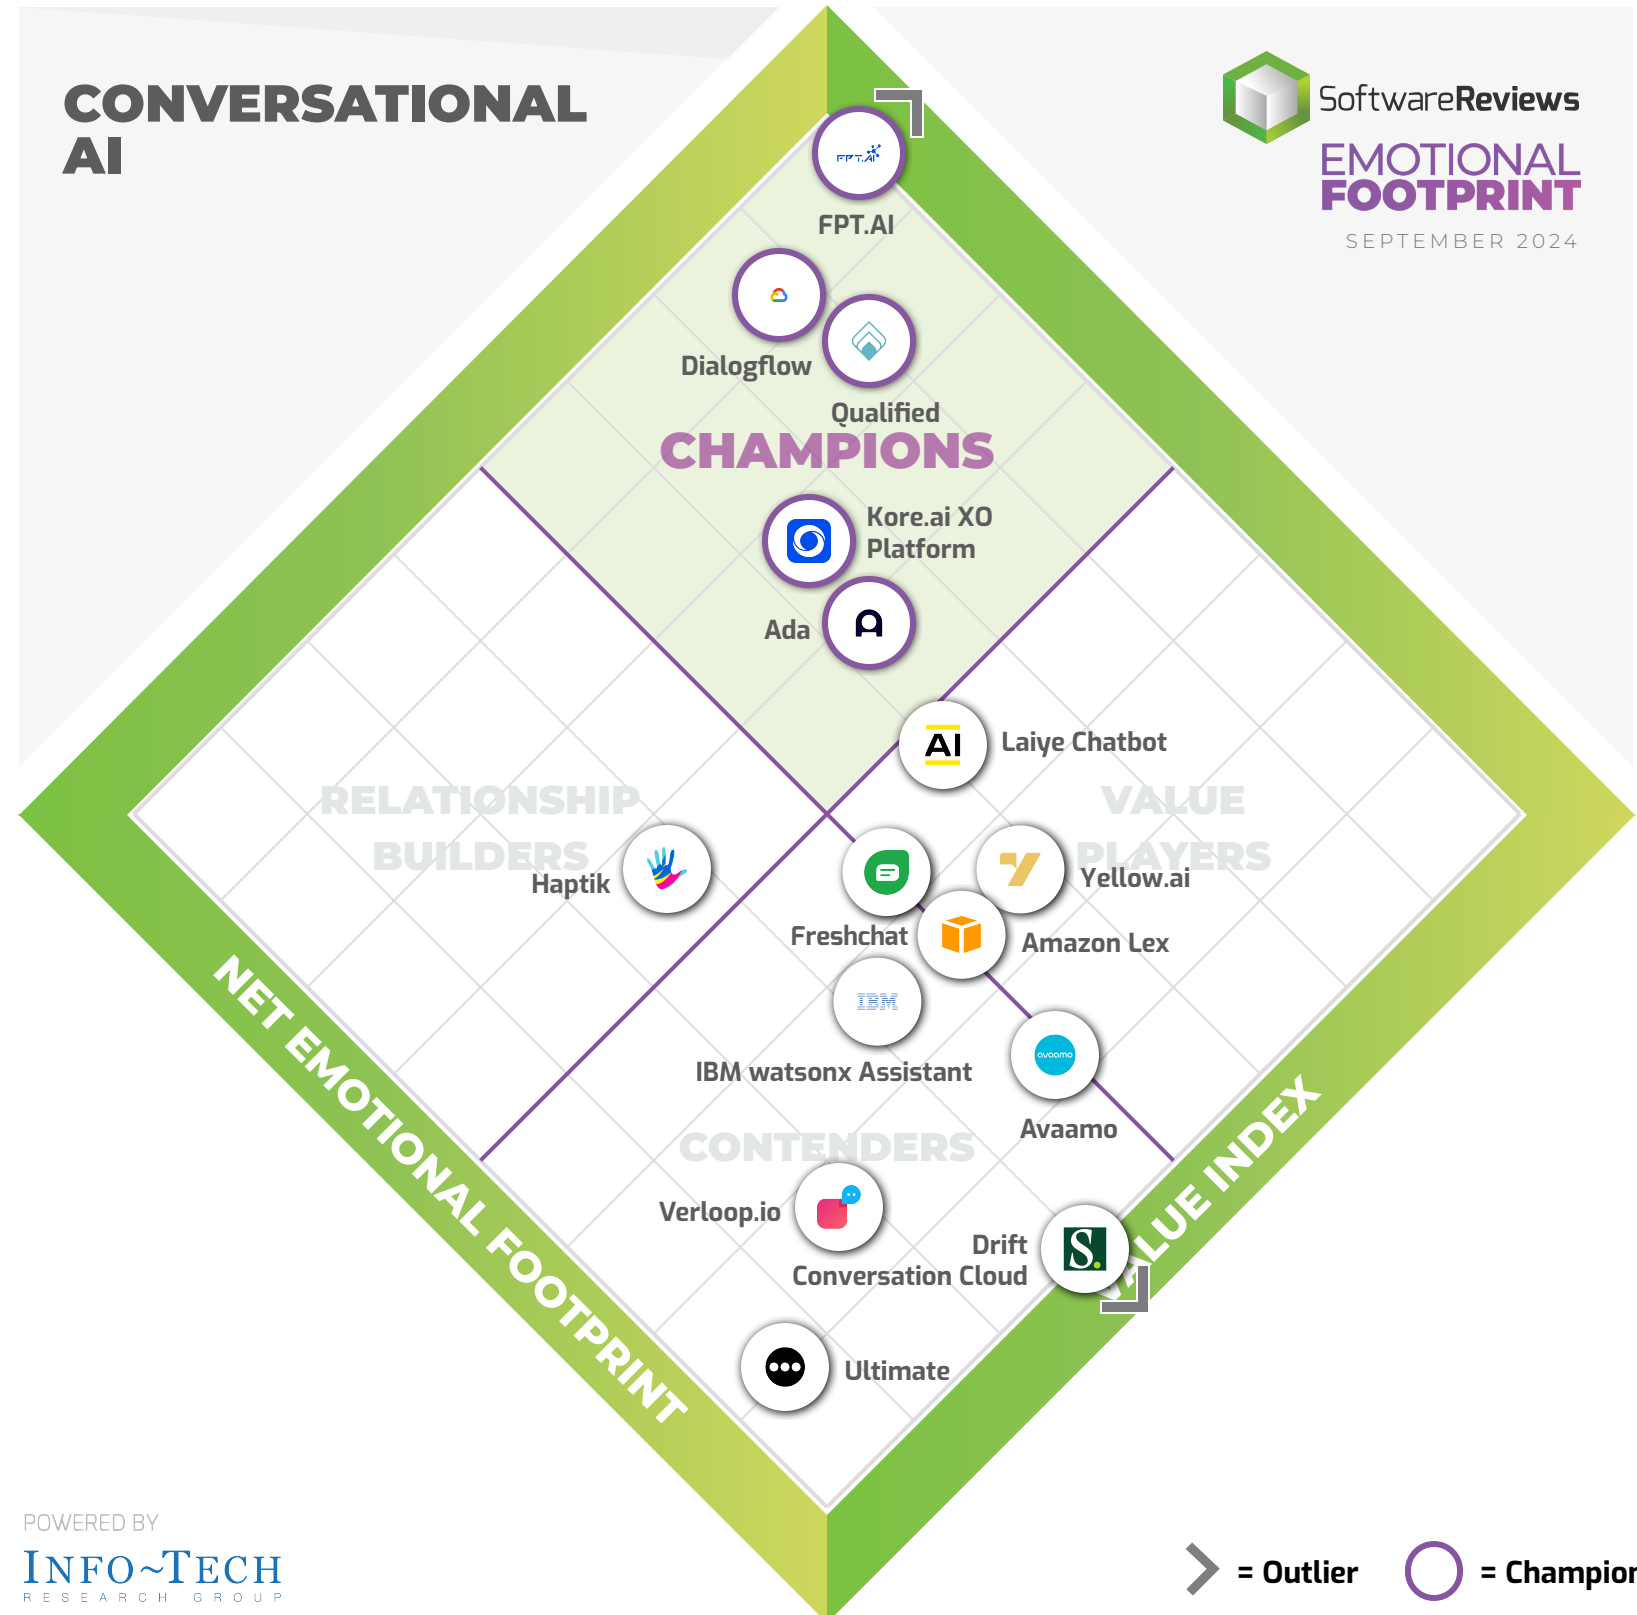

Value Index

Software pricing can be complicated and confusing, but knowing if you're getting business value for the price you're paying is not. The Value Index metric captures user satisfaction with their software given the costs they are paying.

Net Emotional Footprint

The Net Emotional Footprint measures high-level user sentiment. It aggregates emotional response ratings across 25 provocative questions, creating a powerful indicator of overall user feeling toward the vendor and product.

Note: Software product placement is based on the scores provided by users, recency of the reviews, and review volume. Axes are dynamically adjusted based on the minimum and maximum values in the data set.

Emotional Footprint Summary

The Net Emotional Footprint measures high-level user sentiment towards particular product offerings. It aggregates emotional response ratings for various dimensions of the vendor-client relationship and product effectiveness, creating a powerful indicator of overall user feeling toward the vendor and product. While purchasing decisions shouldn't be based on emotion, it's valuable to know what kind of emotional response the vendor you're considering elicits from their users.

CATEGORY
Negotiation and Contract

Negotiation doesn't have to be adversarial. Both parties are always looking to get the best deal, but finding a vendor who will work with you rather than against makes it more likely you'll both be happy with the results. Use the data in this section to determine which vendors will negotiate pleasantly and in good faith.
